## Summary

---

Public sector professional working on digital governance initiatives in regional healthcare systems, including AI experimentation in primary care, telemedicine infrastructure and healthcare data interoperability. Interested in digital public services, data governance and European digital policy.

## Experience

---

**Digital Governance - Healthcare Systems**, Regional Government of Piedmont – Turin, Italy      Dec 2025 – present

Supporting regional digital health transformation through AI governance, data interoperability, and institutional coordination.

- **Digital health governance:** Support the governance of regional digital health initiatives, including telemedicine infrastructure, AI experimentation in primary care, and broader healthcare digital transformation programmes.
- **Inter-institutional coordination:** Participate in working groups and coordination activities involving regional authorities, healthcare organisations and national agencies on digital health systems and data interoperability.
- **Project monitoring:** Monitor the implementation of digital health projects, identifying potential operational, organisational and policy risks related to complex healthcare digital systems.
- **Technical and regulatory analysis:** Analyse technical documentation, project deliverables, and regulatory frameworks related to healthcare digital infrastructure and data systems.
- **Stakeholder coordination:** Facilitate coordination between public administration, healthcare providers, and technology partners involved in regional digital health initiatives.
- **Policy implementation:** Support the implementation of regional digital transformation policies in the healthcare sector through monitoring activities and administrative coordination.
- **Systems awareness:** Develop situational awareness of regional digital health infrastructure, ongoing transformation initiatives and emerging governance challenges.
- **Digital health initiatives:** Contribute to governance and monitoring activities related to AI in healthcare, telemedicine platforms, and healthcare data interoperability initiatives.

**Digital Transformation & Legal Enforcement Officer**, Municipality of Santa Vittoria d'Alba – Italy      Aug 2021 – Nov 2025

Led PNRR-funded digital projects and API integrations while exercising judicial and administrative legal authority.

- **Administrative enforcement:** Conduct regulatory inspections and administrative enforcement activities related to municipal regulations and public safety provisions.
- **Legal & Institutional Accountability:** Represented the municipality in court (Justice of the Peace) and at formal events; drafted and interpreted municipal acts and local regulatory frameworks
- **Emergency & Public Safety Management:** Coordinated police operations and Civil Protection responses during local emergencies, ensuring public safety and strict procedural compliance
- **Conflict Mediation & Public Relations:** Managed complex interactions with citizens and stakeholders in high-pressure or conflictual scenarios, ensuring regulatory compliance through effective communication.
- **Digital Transformation (PNRR):** Directed PNRR-funded projects (SEND, PDND/SUE API), serving as the primary technical liaison between the administration and external technology vendors
- **Process Scaling & Automation:** Digitized the traffic fine workflow via SEND and Cloud integration, successfully scaling volume to 200+ units/year with zero headcount growth
- **Cross-Departmental ICT Support:** Provided internal technical support and spearheaded the digitalization of administrative workflows and internal processes across various municipal offices

**Compliance & Digital Transformation Development**, Sicurtea s.r.l. – Piobesi d’Alba Aug 2019 – July 2021

Developed open-source compliance management tools and supported regulatory audits for public and private clients.

- **Process digitalisation:** Built DESU, an open-source tool to track regulatory deadlines and support audit readiness; integrated a PostgreSQL-backed data model and a desktop UI.
- **Regulatory Compliance:** Conducted technical inspections and measurements to support risk assessments and workplace safety audits in **highly regulated sectors**.

**Operations & Digital Management**, Lentalanga – Diano d’Alba Jan 2012 – Nov 2019

Managed administrative operations and digital adoption for a hospitality business, focusing on process sustainability.

- **Business Administration:** Oversaw organizational processes, budgeting, and financial planning in a non-structured environment.
- **Digital Adoption:** Implemented digital communication and promotion initiatives to drive business growth and stakeholder engagement.
- **Stakeholder Management:** Coordinated relationships with national and international stakeholders and managed facility maintenance workflows.

**Safety Compliance Intern**, Sicurtea s.r.l. – Piobesi d’Alba, Italy Summer 2011

Supported regulatory compliance and technical documentation for occupational health and safety.

- **Audit Support:** Assisted in the drafting of Risk Assessment Documents (DVR) and participated in regulatory safety audits.
- **Data Management:** Performed structured data collection and prepared technical documentation for compliance processes in regulated environments.

## Education

---

**University of Turin**, Bachelor’s degree in Digital Public Administration and Law Sept 2022 – present

Focusing on administrative law, public sector digitalization, and the legal framework of data governance.

- Thesis: Data in the Digital Transformation of Public Administration
- Academic Minor: Diploma in Digital Innovation (DID) awarded by the Department of Law, University of Turin. Advanced training focused on digital innovation in public administration, data governance and emerging technologies.

**Guglielmo Marconi University**, Bachelor’s degree in Computer Engineering – Artificial Intelligence curriculum Mar 2026 – present

Focusing on AI systems, data architecture, and technical implementation of intelligent solutions.

- Current studies centered on machine learning, neural networks, and the architectural requirements for scalable AI systems.

**I.I.S. G. Vallauri**, High School Diploma in STEM – Fossano, Italy Sept 2009 – July 2014

Early exposure to STEM disciplines and computer programming.

- Coursework included Visual Basic, SQL, and foundations of software logic.

## Volunteering

---

**Community Team Leader**, Google Developer Group Torino – Turin, Italy Sept 2016 – Oct 2019

Led a tech community focusing on developer engagement, technical content, and cloud technology ecosystems.

- **Strategic Leadership:** Directed the communication team and orchestrated content strategy, planning, and community engagement.
- **Event Coordination:** Organized technical workshops and large-scale events centered on Flutter, Google Cloud, and emerging software engineering trends.
- **Partnership Management:** Served as the primary liaison between the community, Google, and various technology partners.

Facilitated digital education initiatives and supported technical communication activities.

- **Digital Education:** Delivered "Code for Kids" workshops to schools, promoting digital literacy and early exposure to programming
- **Technical Content:** Created technical articles and provided social media coverage and organizational support for major corporate tech events.

### Open Source / Technical Contributions

- **Void Linux packaging:** Contribute to package maintenance and development within the Void Linux open-source distribution.
- **Open source localisation:** Provide translation and localisation contributions to open-source software projects.
- **Technical community participation:** Engage with open-source communities, contributing to documentation and collaborative development processes.

### Certification

---

**ISC2 Certified in Cybersecurity (CC):** Candidate (Exam expected April 2026)

**DigComp 2.1 - European Digital Competence Framework:** Advanced Digital Skills - Level 6/6 in all areas (Information and data literacy, Communication and collaboration, Content creation, Safety, Problem solving)

**ICDL Profile (Standard Certificate) :** Modules completed: Online & Computer Essentials, Word Processing, Spreadsheets, Presentations, Using Databases

**English: Level B2 (CEFR):** Certified by University Language Centre (CLA-UniTO)

### Selected Honors

---

- **Winner - B-Innovative Challenge (2019):** Developed a digitalization strategy for traditional Piedmontese industrial players (e.g., Guido Gobino, Galup).
- **Winner - E.B.E.C. Torino Case Study (2017):** Designed a biometric-based cardless payment system, presented at the "Salone dei Pagamenti".
- **Winner - Serious Game Design (2016):** Co-designed "Poleaf", an augmented reality serious game to promote circular economy on university campuses.

### Skills

---

**Legal & Governance:** Public Administration, Policy Implementation, Regulatory Analysis, Inter-institutional Coordination, Administrative Law, Digital Governance

**Tech & Data:** Digital Systems & Infrastructure Governance, Data Governance, Data Interoperability, AI Governance, Cybersecurity Fundamentals, Digital Infrastructure Concepts

**Soft Skills:** Policy Analysis, Stakeholder Coordination, Strategic Thinking, Cross-disciplinary Communication, Systems Thinking
